

OPTIPLAN®

An integral component of a lean production environment, Lectra's Optiplan transforms complex orders into optimized spread plans, cut plans and machine instructions. Sophisticated algorithms identify the most efficient and cost-effective ways to reduce fabric consumption and excess inventory. Intercommunication between departments is streamlined, for a fluid operating process, from order-entry system to warehouse to CAD equipment and the cutting room.

Predict Costs

Make better sourcing decisions

1/ Run simulations of different production scenarios. Make informed decisions on how to allocate production, based on a comparative analysis of the results.

2/ Anticipate the time and cost required to spread, cut and bundle production orders in different facilities or locations, taking into account variables such as personnel, labor rates, production capacity and equipment parameters.

Distribution Of Costs

Benchmark Capability

1/ Compare different fabric-width and sizecombination scenarios to assess how changing these variables will impact cost and productivity.

2/ Order fabrics in optimal widths and combine sizes effectively.

Reduce Surplus

Buy only the fabric you use.

Minimize excess inventory and avoid stock shortages by calculating the exact quantities needed to fill projected orders.

Automatic batch Processing

Save up to 30% in order treatment time by importing and processing new orders automatically, as they arrive in your ERP system.

Eliminate Waste & Increase Productivity with Workflow Optimization

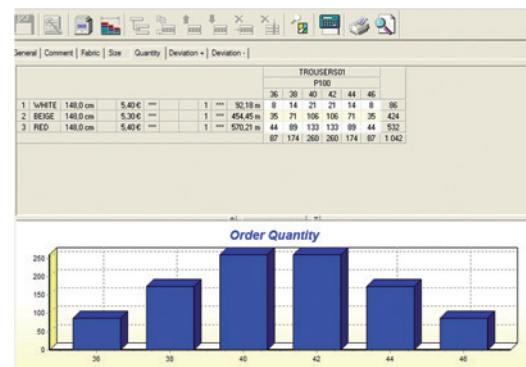

1/ Optimize CAD and cutting-room activities, streamlining the operating process and reducing fabric consumption by up to 5%.

2/ Increase productivity and generate up to 15% in material savings when you use Optiplan in combination with Lectra's automated marker-making, spreading and cutting solutions.

React Quickly to changing Conditions & Priorities

1/ Schedule and adapt manufacturing activities rapidly, in response to changing production constraints or modified priorities.

2/ Reconfigure production plans to meet tight delivery schedules.

Professional Services offer

Lectra puts 40 years of fashion expertise and knowledge at the service of its customers, through a complete consulting offer. Drawing on industry experts, lean methodology consultants and industry best-practices, Lectra's pragmatic project approach comprises a set of assessments, training tools and methods, as well as robust monitoring and reporting, to implement changes which will optimize time to market, cost and quality objectives. Implementation includes change management and training. Projects are adapted to meet the challenges at hand, and include a combination of technology, expertise and support to maximize investments both financial and time.

About Lectra

For forward-looking companies that breathe life into our wardrobes, car interiors, furniture and more, Lectra is committed to crafting the premium technologies that facilitate the digital transformation of their industry. Lectra's offer empowers brands, manufacturers and retailers from design to production, providing them with the market respect and peace of mind they deserve. Supporting the fashion and apparel industry, Lectra offers PLM and CAD software, cutting room solutions and expert services to create, develop and produce garments, accessories and footwear. Founded in 1973, today Lectra has 32 subsidiaries across the globe, serving customers in over 100 countries. With more than 1,700 employees, Lectra reported revenues of \$333 million in 2018. Lectra is listed on Euronext (LSS).
